- Jatoba •
- Brazilian Walnut (IPE) •
- Walnut •
- Brown Ebony •

Benefits of Bedson Timber's exotic hardwoods and floors:

1. They contribute to a healthy environment.
According to the Environmental Protection Agency (EPA), indoor air quality remains one of today's top health threats. Unlike carpets wood floors don't give pollen, animal dander, mould, etc. any place to hide and thrive. This creates better air quality for all.
2. Sustainable hardwoods are environmentally friendly.
Genuine wood flooring comes from a totally natural resource that is environmentally sustainable. Most timber is certified and harvested from forests that are carefully managed to ensure continued resources in the future.
3. A durable flooring surface is cost-effective.
Over a lifetime, solid wood floors represent the best value. Unlike other products that will need to be replaced in less than ten years, hardwood floors will last the lifetime of the building. When you do dispose of your hardwood floors, they are a naturally biodegradable product.
4. Hardwood floors improve the structural integrity of a building.
Once installed in a home they are one of the best natural insulating materials, helping to conserve energy resources and reduce heating bills in winter. On average, wooden floors are several degrees warmer than tiles.
5. Easier and quicker to sell upmarket homes at a premium.
The flooring choices you make today will affect the price you can get for your home when you sell it. Unlike that carpet, wooden floors last a long time and add value to a home.

Care and Maintenance:

Use a damp cloth to blot up spills as soon as they happen. Never allow liquids to stand on your floor. For tough spots, such as oil, paint, markers, lipstick or ink, use acetone/nail polish remover on a clean white cloth, then wipe the area with a damp cloth to remove any remaining residue.

Sweep, dust, or vacuum the floor regularly with the hard floor attachment (not the beater bar) to prevent accumulation of dirt and grit that can scratch or dull the floor finish. Periodically clean the floor with cleaning products made specifically for pre-finished hardwood floor care.

Do not wash or wet mop the floor with soap, water, oil-soap detergent, or any other liquid cleaning material. This could cause swelling, warping, delimitation, and joint-line separation, and void the warranty.

Do not use steel wool, abrasive cleaners, or strong ammoniated or chlorinated type cleaners.

Do not use any type of buffing or polishing machine.

For spots such as candle wax or chewing gum, harden the spot with ice and then gently scrape with a plastic scraper, such as a credit card. Be careful not to scratch the flooring surface. Wipe clean with a damp cloth.

For tough stains, you may need to use a heavy-duty stain remover made specifically for hardwood floors.

A more frequent dust-mopping or vacuuming schedule may be required in very sandy areas such as a beach home.
