

# *Infralok™ 150*

Infralok 150 Available in Grey only

**INFRASET**

THE AVENG GROUP

# Infralok™ 150

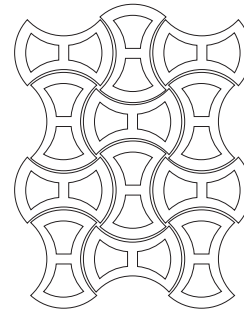

The Infralok™ erosion control system is unique in its flexibility and aesthetic appeal.

## Product features

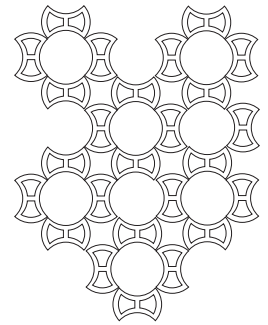

- The INFRASET Infralok 150 is a light versatile concrete block which provides the ideal solution for homeowners and DIY enthusiasts wishing to create an erosion control system in their gardens.
- With the Infralok 150 construction is simple. Blocks can be rapidly laid without the need for foundations or mortar.
- Please note: If the area is subject to traffic, i.e. driveways, or significant water flow, the subbase should be sufficiently prepared before bedding the blocks.
- The blocks can be laid in various configurations depending on the aesthetic requirement or the condition of the soil and vegetation of the area.
